S.Y.B.ED.

2021-22

B.Ed. Course Code : 201

## **Quality and Management of School Education**

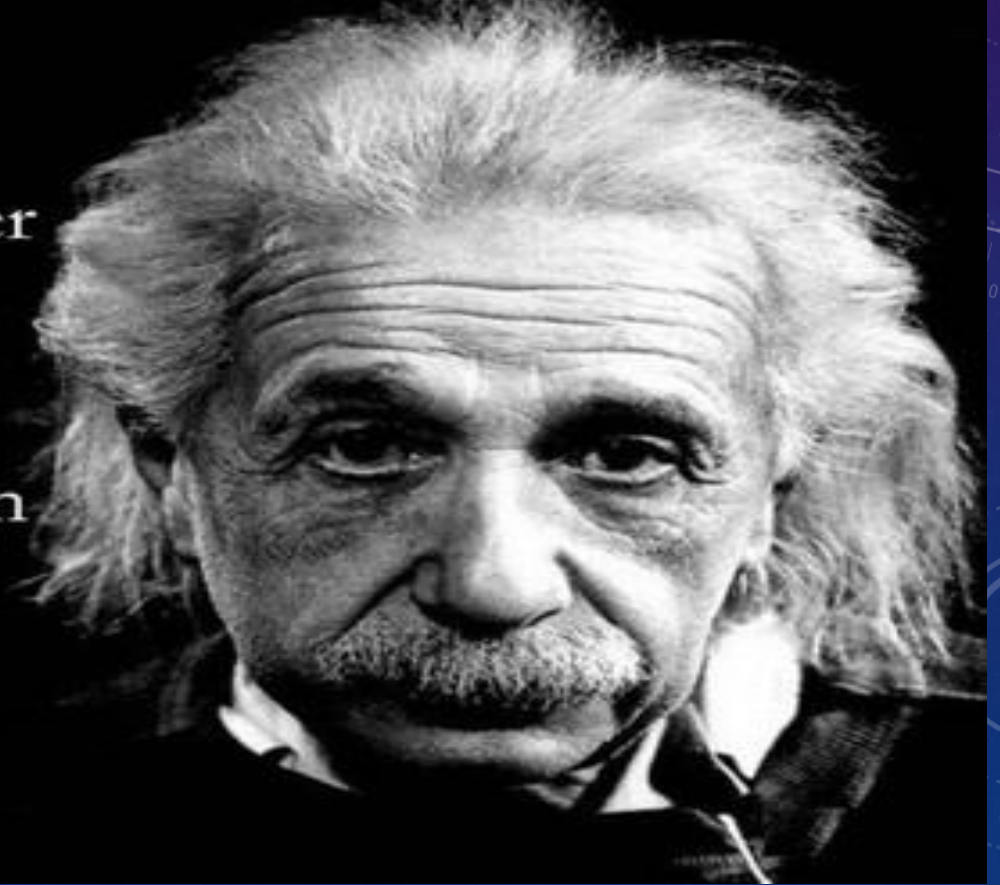

Wastage and stagnation

Presented by :

Asst.Prof.Dr. Prajakta Medhekar

Education is what remains after  
one has forgotten what one  
has learned in school.

Albert Einstein

Out of every 100 children in India

40-50 do not enrol  
in schools at all.

50-60 enter  
primary  
schools. Out  
of these,  
about 30-40  
soon drop  
out.

20-25 enter  
middle  
school. Of  
these, a  
further 10-15  
drop out.

5-10 enter  
higher second-  
ary schools.  
Of these a  
further 4-6  
drop out.

Only 1-2 chil-  
dren eventu-  
ally enter  
college.

# STAGNATION

- The term stagnation can be defined as
- “Failure to complete the prescribed course in a prescribed time”
- “Failure of students in the same class for one or for a number of time”
- This is equivalent to

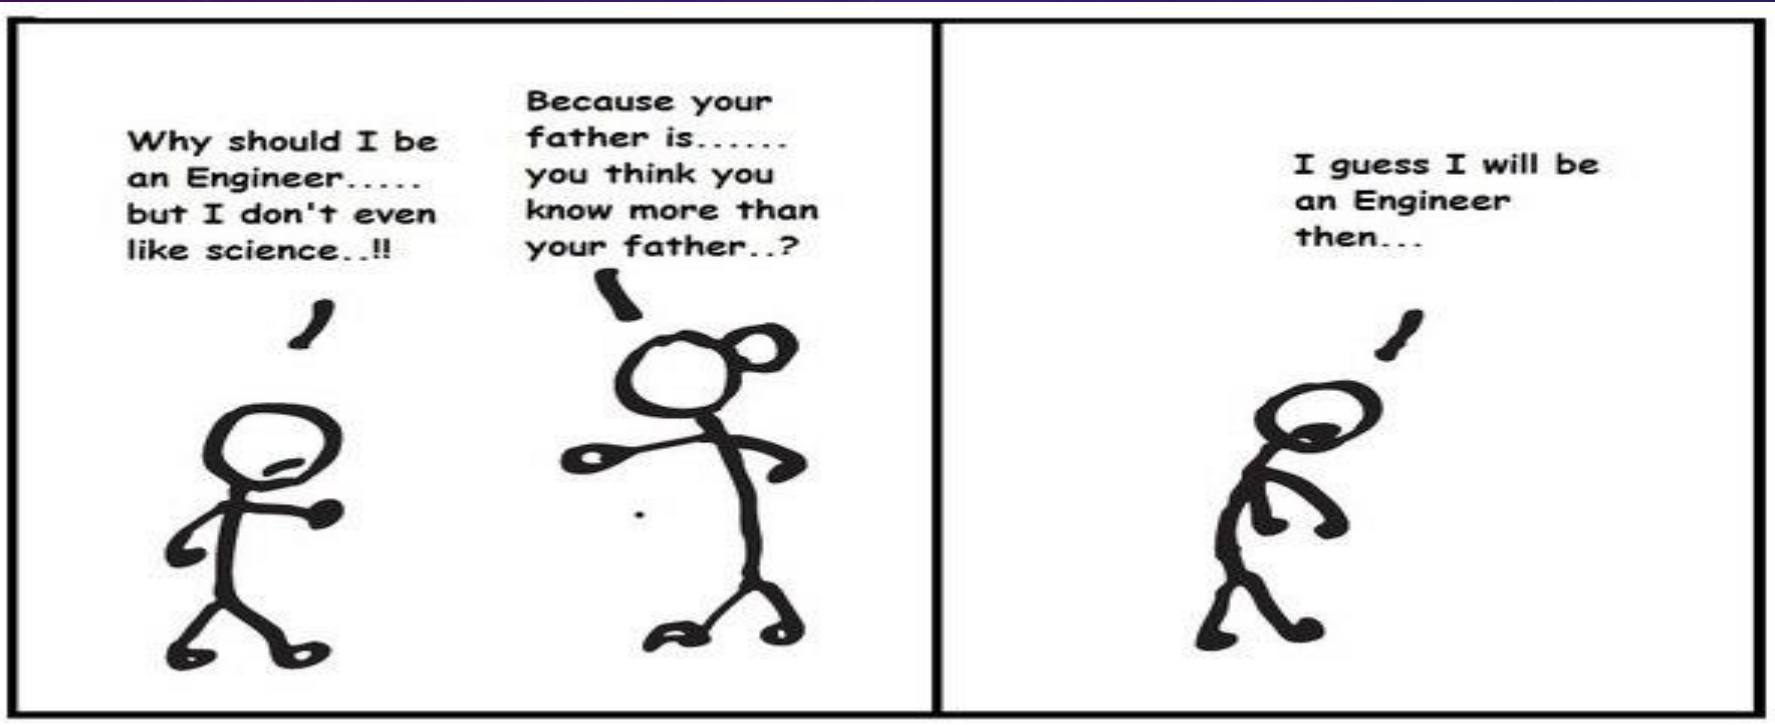

Education  
without  
Application is  
Stagnation

# CAUSES OF STAGNATION

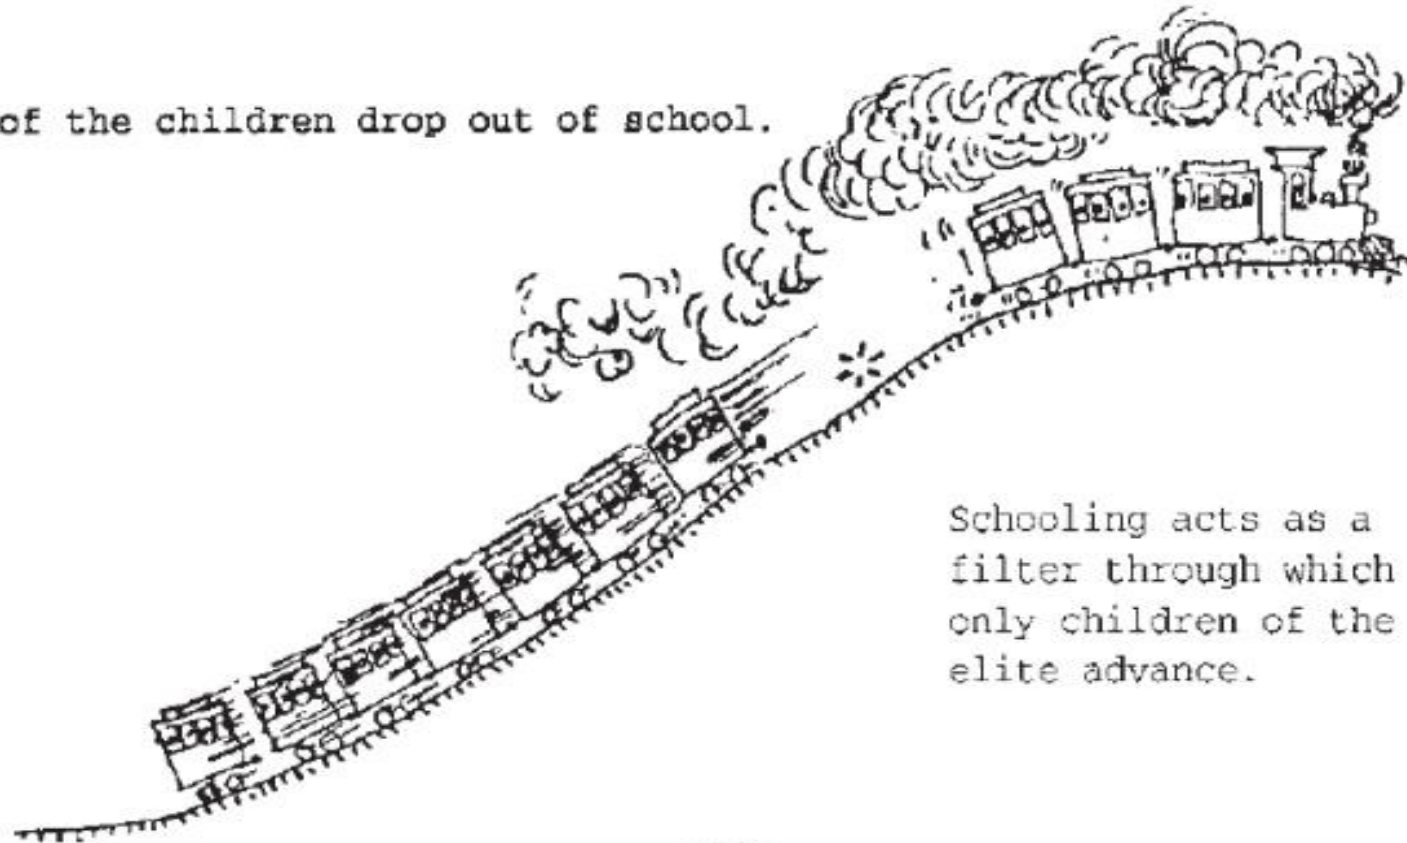

- 1) Highly unattractive Course :-
- Syllabus is very complicated
- Subjects difficult to understand,
- Teaching method used are defective

- Un
- Sch
- Stu

- F
- C
- D

Most of the children drop out of school.

Schooling acts as a filter through which only children of the elite advance.

- Absence of proper Resources in a School
- For qualitative education there is need to have proper physical & human resources
- Skilled & experienced teachers
- Salaries for teachers
- Defective Teaching Methods
- Teachers used teacher centered methods

- Lack of proper Examination System
- Today's evaluation system is only information oriented
- It is based on rote learning
- Teachers lay emphasis on

# REMEDIES TO OVERCOME THE PROBLEM OF STAGNATION

- Healthy Atmosphere in School
- This helps to create positive attitude
- Gives positive reinforcement for students

# USE OF MODERN TEACHING METHODS

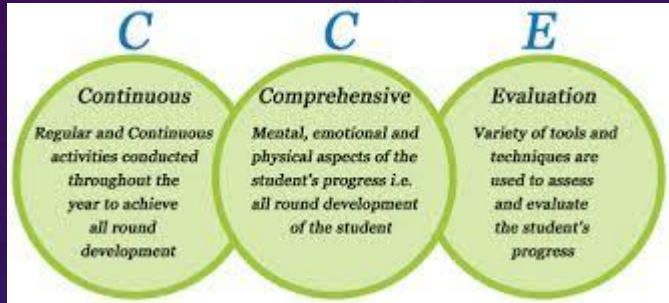

Dr.Prajakta Medhekar

- Health programme for students

- Body
- c , Scouts & guides

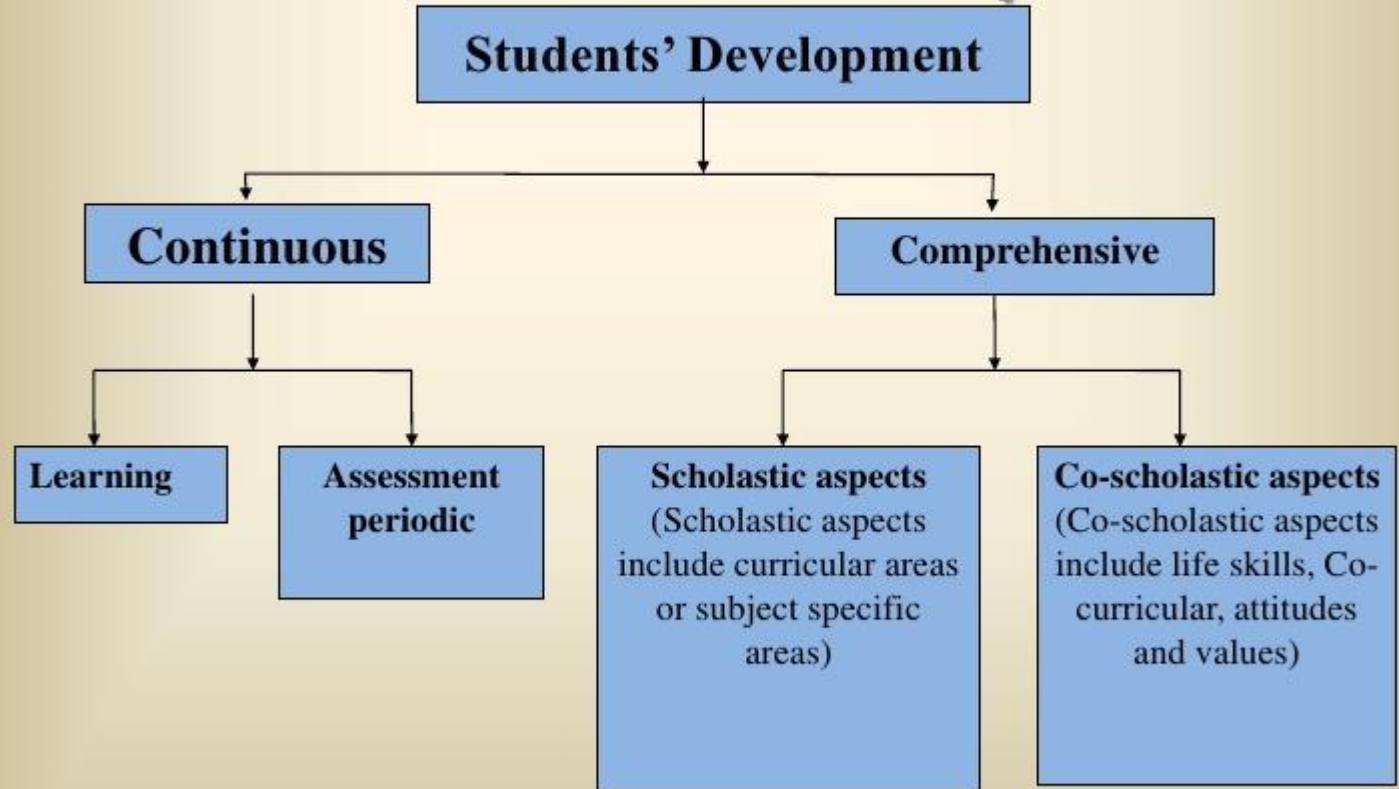

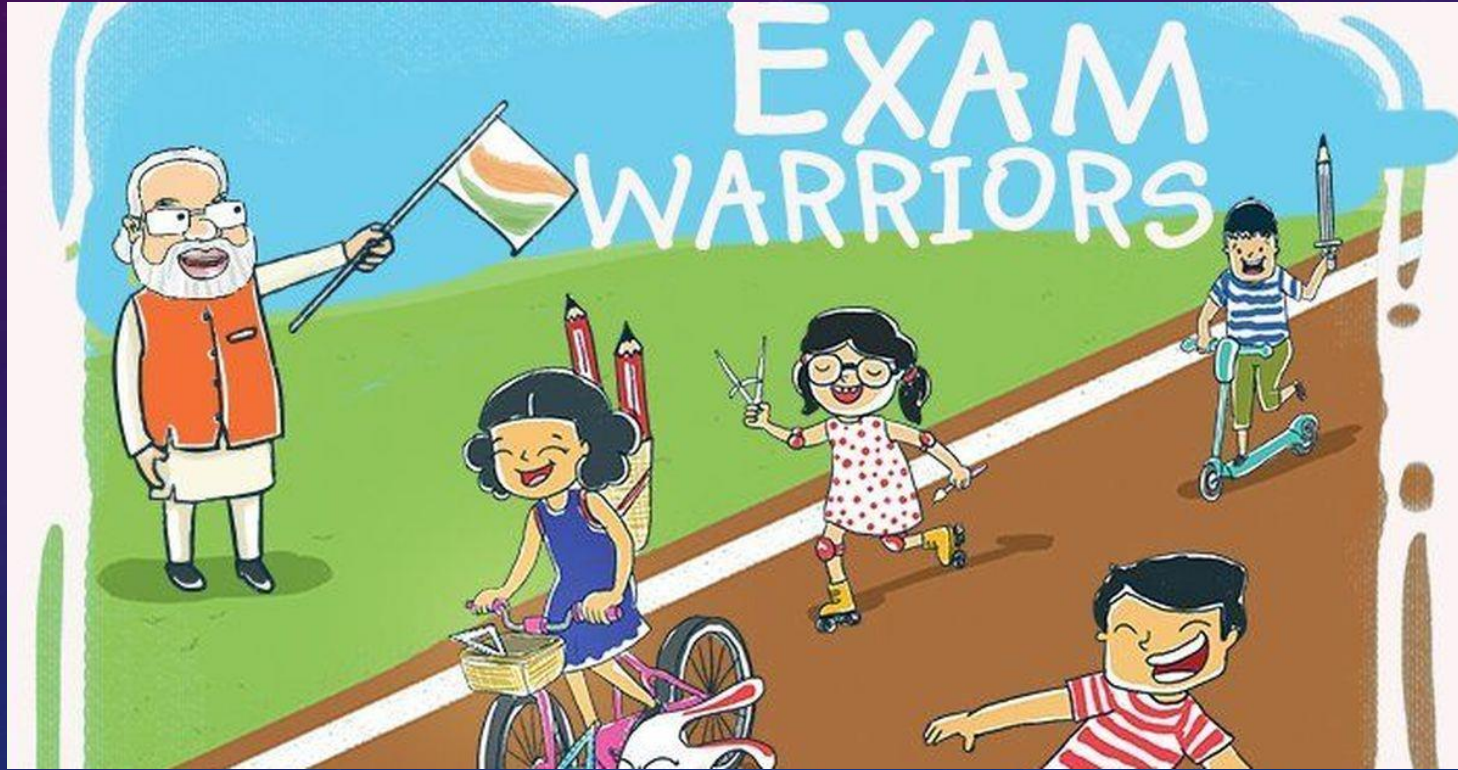

Evaluation

## CCE : System of school-based evaluation of students that covers all aspects of

- Appointment of Trained Teachers
- Teachers who have undergone pre-service training should be appointed
- All are the various solution to solve the problem of stagnation .One must bear in mind that the problem of wastage & stagnation cannot be wiped .

# CROWDED CLASSROOM

- The number of elementary and middle-school classrooms defined as "overcrowded" under the teachers' contract has more than doubled since last year.
- A class is defined as overcrowded when the number of students exceeds the limits set in the teacher's contract. Pre-kindergarten classes are required to have 18 or fewer students, kindergarten classes are set at 25, grades one through six are set at 32. The city council has set aside funding so that elementary school classes can be limited to 28. Middle school classes are set at between 30 and 33, and high school classes are set at 34.

- Unfortunately, the teacher has spent all day and every day since the beginning of the school year hassling with student over various situations and less time dealing with learning or teaching questions. This has reached a point that all they want to do is give the required topics and send the students on the way.
- The students lose interest and become bored because all the teacher does is stand facing to board writing the exercises and explain them to the whiteboard to avoid looking at the problems in the classroom. Many times the teacher will repeat the exercise over and over so the student will capture the idea but in reality the students are not paying attention.
